A call to action

This is the first Biodiversity Delivery Plan for the East of England. It is a call to action for everyone in the Region to address the challenges facing its natural environment.

Tackling the six challenges will both help increase prosperity and improve the wellbeing of all who live and visit this Region.

Explaining the Plan

To help you understand our Plan and show its components we have unravelled it so as to reveal its constituent parts.

There are two main components to the Plan:

- What is currently there ('Situation') and
- What we would like in place ('Aspirations')

Key

Situation

- [Marine](#)
- [Coastal](#)
- [Nature reserves/SSSI](#)
- [Watercourses](#)
- [Core nature areas](#)
- [Urban](#)

Aspirations [more](#)

- [Buffer zones](#)
- [Functional links](#)
- [Natural 'highways'](#)
- [Landscape-scale thinking](#)
